

EAGLE College Prep Schools

HEAT INDEX GUIDELINES AND PROCEDURES

Purpose

EAGLE is committed to protecting the health and safety of our students and staff. We provide various opportunities for outdoor physical activities before, during, and after school. These guidelines are meant to provide a decision-making structure to promote student and staff safety when local weather may be detrimental to their health.

Students need daily, vigorous exercise. These guidelines are intended to provide preventive strategies that may limit or revise certain activities for physical education and other outdoor programs before, during, or after school.

Hot Weather

Heat induced illness is preventable. Children do not adapt to extremes of temperature as effectively as adults for the following physiological reasons (American Academy of Pediatrics, 2000):

- Higher surface area-to-body mass ratio than adults, allowing a greater amount of heat to transfer from the environment to the body.
- During physical activity, children produce more metabolic heat than adults.
- Sweating capacity is considerably lower in children than adults, reducing the ability to dissipate body heat by evaporation.

Guidelines

When excessive heat occurs, the following precautions are to be taken for all outdoor physical activity, including but not limited to: recess, physical education classes, and field trips.

Students should be hydrated before going outside and have access to drinking water while outside. In activities lasting longer than 30 minutes, periodic water breaks should be incorporated (approximately every ten minutes).

The HEAT INDEX is the “feels like” or effective temperature. As relative humidity increases, the air seems warmer because the body is less able to cool itself via evaporation of perspiration. As the index rises, so do the health risks (Scottsdale Unified, 2005).

During the school year, on days that exceed 95 degrees or above, a school designee will inform the staff of the Heat Advisory. Once the Heat Advisory is communicated, the suggested guidelines will be put into place. Notification of a Heat Advisory will be shared on our social media sites.

Guidelines for determining Heat Index

Temperature and humidity data shall be obtained from weather.com. Details specific to the school should be accessed as follows:

- Enter school zip code (district office zip code will be used)
- Select: “hour-by-hour” tab
- Highest estimated temperature and humidity during school hours should be used to calculate HEAT INDEX from the chart below. Limit activities according to second chart.

		% RELATIVE HUMIDITY																			
		5	10	15	20	25	30	35	40	45	50	55	60	65	70	75	80	85	90	95	100
T E M P E R A T U R E	85	79	80	81	82	83	84	85	86	87	88	89	90	91	93	95	97	99	102	105	108
	90	84	85	86	87	88	90	91	93	95	96	98	100	102	106	109	113	117	122		
	95	88	90	91	93	94	96	98	101	104	107	110	114	119	124	130	136				
	100	93	95	97	99	101	104	107	110	115	120	126	132	138	144						
	105	97	100	102	105	109	113	118	123	129	135	142	149								
	110	102	105	108	112	117	123	130	137	143	150										
	115	107	111	115	120	127	135	143	151												
	120	111	116	123	130	139	148														
	125	116	123	131	141																
	130	122	131																		

Heat Index	Category	Activity Limitations
<80		No limitations
80 to 89	Caution	75% vigorous activity/25% light activity or rest. Encourage hydration.
90 to 104	Extreme Caution	50% vigorous activity/50% light activity or rest. Enforce hydration. Sunstroke, heat cramps and heat exhaustion possible.
105 to 114	Danger	25% vigorous activity/75% light activity or rest. Enforce hydration. Sunstroke, heat cramps and heat exhaustion likely. Heat stroke possible
115 to 129	High Danger	All nonessential outdoor activities will be cancelled.
130+	Extreme Danger	All nonessential outdoor activities will be cancelled.

Sample Plan for Extreme Caution or Danger Categories:

Lunch time: 20 minutes in cafeteria
 5-10 minutes outside activity

Recess: Alternate shaded activities with sun exposure limit of 10 minutes

******High Danger or Extreme Danger temperatures will cancel all outdoor activities******

School Recommendations:

- School creates a communication channel to use when Heat Advisory is in effect.
- Communicate that students are allowed to bring water bottles to school and have access to them throughout the day.
- Provide Heat Related Illness training for playground aides, Physical Education teachers, and athletic coaches.
- Add a Heat Related Illness Information Test to the list of required online tests (OSHA, Blood Borne Pathogens, etc.) for all school-based staff.

Parent Communication Tools:

- Place a link for Heat Index information on school websites.
- Have this plan accessible for parents.
